## Executive Summary

The twelfth administration of the Massachusetts Comprehensive Assessment System (MCAS) tests took place in spring 2009.

### Participation

A total of 553,635 Massachusetts public school students in grades 3–10 participated in a total of 17 MCAS tests in English Language Arts, Mathematics, and Science and Technology/Engineering.<sup>1</sup> Participation rates remained very high, ranging from 98 to 100 percent across the grades and subjects tested.

In 2009, 8,732 students with disabilities participated in the MCAS Alternate Assessment (MCAS-Alt) by submitting portfolios documenting their academic achievement in one or more subjects in grades 3–12.

### Overall Achievement

Student achievement statewide improved on a majority of the 17 MCAS tests administered in 2009. Between 2008 and 2009, the percentage of students scoring *Proficient* or higher<sup>2</sup> improved by two or more percentage points on four of the seven grade-level tests in English Language Arts (ELA), three of seven grade-level tests in Mathematics, and one of three grade-level tests in Science and Technology/Engineering (STE).

Achievement in 2009 was strongest in English Language Arts and improved statewide at all grade levels except grade 6. The percentage of students statewide scoring *Proficient* or higher ranged from

- 54 percent at grade 4 to 79 percent at grade 10 in ELA
- 48 percent at grades 4 and 8 to 75 percent at grade 10 in Mathematics
- 39 percent at grade 8 to 61 percent at the high school level in STE

Grade 10 students generally made stronger gains in 2009 than students at other grade levels, with increases of four percentage points in ELA, three points in Mathematics, and four points in STE. Other large gains were made in ELA by grade 4 students (five points) and grade 8 students (three points).

### Trends in Achievement

Since the inception of the MCAS program in 1998, student achievement in English Language Arts and Mathematics has risen markedly at most grade levels. At grade 10, where high stakes have been attached to tests in both subjects since 2001 (for the class of 2003), the percentage of students scoring *Proficient* or higher has increased from 38 percent in 1998 to 79 percent in 2009 in ELA, and from 24 percent in 1998 to 75 percent in 2009 in Mathematics. Figure 1 on the following page shows the improvement in the percentage of students scoring *Proficient* or higher in grade 10 ELA and Mathematics for the duration of the MCAS program. Table E-1 provides ELA and Mathematics results at all grade levels for 1998–2009; the individual grade-level tests were first administered beginning in different years.

---

<sup>1</sup> The four subject-specific high school Science and Technology/Engineering tests in Biology, Chemistry, Introductory Physics, and Technology/Engineering given in grades 9 and 10 are counted here as one operational test.

<sup>2</sup> In this report, *Proficient* or higher refers to the cumulative percentage of students scoring at the *Proficient* and *Above Proficient* levels at grade 3, and the *Proficient* and *Advanced* levels at grades 4–10.

## Achievement by Subgroup

All student subgroups made gains in each subject at some grade levels between 2008 and 2009. More proficiency gaps—the difference between the percentage of students in subgroups versus all students who scored *Proficient* or higher—narrowed than widened, although many gaps stayed the same.

Achievement in grade 8 Science and Technology/Engineering was especially poor for many subgroups—only 13 percent of both African American and Hispanic/Latino students, 11 percent of students with disabilities, 4 percent of LEP students, and 16 percent of low-income students scored *Proficient* or higher in grade 8 STE.

## Race/Ethnicity

In 2009, 65 percent or more of Asian students scored *Proficient* or higher at five of the seven grade levels tested in ELA, at all seven grades tested in Mathematics, and at the high school level only in STE. Sixty-five percent or more of white students scored *Proficient* or higher at all grades tested in ELA except grade 4, at grades 3 and 10 only in Mathematics, and at the high school level only in STE. Forty percent or less of African American and Hispanic/Latino students scored *Proficient* or higher on all Mathematics and STE tests except grade 10 Mathematics, and at three and four grades, respectively, of the seven grade levels tested in ELA.

### *English Language Arts*

Between 2008 and 2009 in ELA, the percentage of African American, Asian, Hispanic/Latino, and white students scoring *Proficient* or higher improved by one to seven percentage points at most grade levels. African American and Hispanic/Latino students made substantial gains at grade 10, where both subgroups improved by seven percentage points.

The proficiency gap in ELA between white students and African American students narrowed by one to three percentage points at grades 7, 8, and 10 between 2008 and 2009, while the gap widened by one to two points at grades 3, 4, and 6. The proficiency gap between white and Hispanic/Latino students narrowed by one to two points at grades 5, 7, 8, and 10 and showed no change at grades 3, 4, and 6.

### *Mathematics*

In Mathematics, the four major racial/ethnic subgroups in the state made improvements of one to three percentage points between 2008 and 2009 at grades 5, 7, and 10, while there was no change or a decline in performance of up to four points at grades 3 and 4. At grade 6, African American students improved by two points, Hispanic/Latino students declined by one point, and Asian and white students showed no change.

The proficiency gap in Mathematics between white students and African American students widened at grade 3 only, by four percentage points, between 2008 and 2009, narrowed by one to two points at grades 4–6, and stayed the same at grades 7, 8, and 10. The proficiency gap between white students and Hispanic/Latino students widened by one to four points at grades 3, 4, 6, and 10, showed no change at grades 5 and 8, and narrowed at grade 7, by one percentage point.

### *Science and Technology/Engineering*

Between 2008 and 2009 in STE, all four of the major racial/ethnic subgroups in the state made gains of two to five percentage points at the high school level. Asian and Hispanic/Latino students experienced gains at all three grade levels tested, African American students improved at grade 8 and the high school level, and white students improved at the high school level only.

The proficiency gap in STE between white students and African American students did not change at grade 5 and the high school level and narrowed by two percentage points at grade 8. The proficiency gap in STE between white students and Hispanic/Latino students narrowed by three points at grade 5 and two points at grade 8 and widened by one point at the high school level.

### **Students with Disabilities**

In 2009, less than 25 percent of students with disabilities scored *Proficient* or higher at three of seven grade levels tested in ELA, at all grades tested in Mathematics except grades 3 and 10, and at all grades tested in STE.

Achievement of students with disabilities improved between 2008 and 2009 at all grade levels tested in ELA except grades 3 and 6, at three of the seven grade levels tested in Mathematics, and at two of the three grades tested in STE. Large gains were made in ELA at grades 8 and 10 (four and seven points, respectively), in Mathematics at grade 10 (four points), and in STE at the high school level (three points).

In ELA, the proficiency gap between students with disabilities and all students narrowed by one percentage point at grade 8 and three points at grade 10 between 2008 and 2009, widened by one to three points at grades 3–6, and stayed the same at grade 7. The proficiency gap in Mathematics between students with disabilities and all students narrowed by one point at grades 8 and 10, widened by one to two points at grades 4, 5, and 7, and remained the same at grades 3 and 6. In STE, the proficiency gap between students with disabilities and all students narrowed by one point at grade 8, widened by one point at the high school level, and showed no change at grade 5.

### **Limited English Proficient Students**

In 2009, less than 25 percent of limited English proficient students scored *Proficient* or higher at all seven grade levels tested in ELA, at all grades tested in Mathematics except grades 3 and 10, and at all grades tested in STE.

Achievement of LEP students improved between 2008 and 2009 at all grade levels tested in ELA except grade 7, at five grades tested in Mathematics, and at two of the three grades tested in STE. Large gains were made in ELA at grades 4 and 8 (five and four points, respectively). Achievement in grade 3 Mathematics declined by four points.

The proficiency gap in ELA between LEP students and all students narrowed by one to three percentage points at grades 3, 6, and 8 between 2008 and 2009, widened by two points at grades 7 and 10, and stayed the same at grades 4 and 5. In Mathematics, the proficiency gap between LEP students and all students narrowed by one point at grade 6 and three points at grade 8, widened by one to three points at grades 3, 7, and 10, and remained the same at grades 4 and 5. In STE, the proficiency gap between LEP students and all students narrowed by one point at grade 8 and three points at grade 5 and widened by four points at the high school level.

## Low-Income Students

In 2009, 40 percent or less of low-income students scored *Proficient* or higher at all grade levels tested in both Mathematics and STE with the exception of grade 10 Mathematics, and at three of seven grades tested in ELA.

Achievement of low-income students improved between 2008 and 2009 at all grade levels tested in ELA except grade 6, at four grades tested in Mathematics, and at all three grade levels tested in STE. Large gains were made in ELA at grades 8 and 10 (seven and eight points, respectively), in Mathematics at grades 7 and 10 (three points each), and in STE at the high school level (five points).

In ELA, the proficiency gap between low-income students and all students widened at grade 4 only, by two percentage points, between 2008 and 2009, and narrowed at all other grade levels by one to four points. The proficiency gap in Mathematics between low-income students and all students narrowed at grades 7 and 8 by one point, widened at grade 3 only, by two points, and showed no change at grades 4–6 and 10. In STE, the proficiency gap between low-income students and all students narrowed at all grade levels by one to two points.

## Attainment of Competency Determination Required for High School Graduation

All Massachusetts students who are seeking to earn a high school diploma must meet the Commonwealth's Competency Determination (CD) standard in addition to all local graduation requirements. The CD requirement was established as part of the Massachusetts Education Reform Act of 1993 to ensure that students graduating from school have the knowledge and skills they need to succeed in college and today's workplace. Beginning with the class of 2010, in order to earn a CD, students must **either** earn a scaled score of 240 (*Proficient*) or higher on the grade 10 MCAS ELA and Mathematics tests or retests, **or** earn a score of 220–238 on the grade 10 MCAS ELA and Mathematics tests or retests and fulfill the requirements of an Educational Proficiency Plan (EPP). Students in the class of 2010 and beyond also must earn a score of 220 or higher on one of four subject-specific high school MCAS tests in Science and Technology/Engineering (Biology, Chemistry, Introductory Physics, or Technology/Engineering) to earn a CD.

To date, 65 percent of students in the class of 2011 (grade 10 students in 2009) have already fully met the CD standard by performing at the *Proficient* level or higher in both ELA and Mathematics and by performing at the *Needs Improvement* level or higher in STE. For the separate components of the CD requirement, 66 percent of students performed at the *Proficient* level or higher in both ELA and Mathematics, and 88 percent of students performed at the *Needs Improvement* level or higher in STE.

Eighty-three percent of students in the class of 2011 have already met or partially met the MCAS requirements for earning a CD by performing at the *Needs Improvement* level or higher in ELA, Mathematics, and STE (see Figure 2 on the next page). More than one-third of the students in the class of 2011 require an Educational Proficiency Plan: 5 percent require an EPP in ELA only, 11 percent require one in Mathematics only, and 18 percent require one in both subjects.

**Figure 2: 2009 Statewide MCAS Results: Class of 2011**  
**Percentage of Students Scoring *Needs Improvement* or Higher in English Language Arts, Mathematics, and Science and Technology/Engineering through Spring 2009**

The percentage of students in the class of 2011 scoring *Needs Improvement* or higher in ELA, Mathematics, and STE varied widely by subgroup.

- Of the major racial/ethnic subgroups in the state, the percentage of students scoring *Needs Improvement* or higher in all three subjects was highest for white students at 90 percent, followed by Asian students at 87 percent, African American students at 66 percent, and Hispanic/Latino students at 62 percent.
- Thirty-five percent of limited English proficient students performed at the *Needs Improvement* level or higher in all three subjects, while 55 percent of students with disabilities and 68 percent of low-income students did so.

## I. Summary of the 2009 Statewide MCAS Results

In spring 2009, 553,635 Massachusetts public school students in grades 3–10 participated in the twelfth administration of the Massachusetts Comprehensive Assessment System (MCAS) tests. A total of 17 MCAS tests in English Language Arts, Mathematics, and Science and Technology/Engineering were administered to students across eight grade levels. State-level results for these tests are provided in this report.

### Performance Level Results by Subject

#### English Language Arts

Student achievement in English Language Arts (ELA)<sup>3</sup> improved in 2009 from 2008 statewide across all grade levels, with the exception of grade 6. The percentage of students statewide scoring *Proficient* or higher in 2009 ranged from 54 percent at grade 4 to 79 percent at grade 10.

In 2009, the largest score gains were made by students in grades 4 and 10, where the percentage of students scoring *Proficient* or higher increased by five and four percentage points, respectively, since 2008. The percentage of grade 6 students scoring *Proficient* or higher declined by one percentage point.

Table 1 below summarizes the percentage changes in ELA achievement by students statewide between 2008 and 2009.

Table 1: 2008–2009 Statewide MCAS English Language Arts Results			
Grade	Percentage of Students Scoring <i>Proficient</i> or Higher		Percentage Point Change, 2008 to 2009
	2008	2009	
Grade 3	56	57	+1
Grade 4	49	54	+5
Grade 5	61	63	+2
Grade 6	67	66	-1
Grade 7	69	70	+1
Grade 8	75	78	+3
Grade 10	75	79	+4

#### Mathematics

Student achievement in Mathematics improved statewide at grades 5–7 and 10 and declined at grades 3, 4, and 8 between 2008 and 2009. The percentage of students scoring *Proficient* or higher in 2009 ranged from 48 percent at grades 4 and 8 to 75 percent at grade 10.

In 2009, the largest score gains were made by students in grade 10, where the percentage of students scoring *Proficient* or higher increased by three percentage points since 2008. The percentage of students scoring *Proficient* or higher at grades 3, 4, and 8 each declined by one percentage point.

---

<sup>3</sup> The ELA tests at grades 3, 5, 6, and 8 assess reading comprehension, while the ELA tests at grades 4, 7, and 10 assess reading comprehension and writing.

Table 2 below summarizes the percentage changes in Mathematics achievement by students statewide between 2008 and 2009.

<b>Table 2: 2008–2009 Statewide MCAS Mathematics Results</b>			
<b>Grade</b>	<b>Percentage of Students Scoring <i>Proficient</i> or Higher</b>		<b>Percentage Point Change, 2008 to 2009</b>
	<b>2008</b>	<b>2009</b>	
Grade 3	61	60	-1
Grade 4	49	48	-1
Grade 5	52	54	+2
Grade 6	56	57	+1
Grade 7	47	49	+2
Grade 8	49	48	-1
Grade 10	72	75	+3

## Science and Technology/Engineering

Student achievement in Science and Technology/Engineering (STE) improved statewide at grade 10 by four percentage points between 2008 and 2009, remained the same at grade 8, and declined by one point at grade 5. The percentage of students scoring *Proficient* or higher in 2009 ranged from 39 percent at grade 8 to 61 percent at grade 10.

Table 3 below summarizes the percentage changes in STE achievement by students statewide between 2008 and 2009.

<b>Table 3: 2008–2009 Statewide MCAS Science and Technology/Engineering Results</b>			
<b>Grade</b>	<b>Percentage of Students Scoring <i>Proficient</i> or Higher</b>		<b>Percentage Point Change, 2008 to 2009</b>
	<b>2008</b>	<b>2009</b>	
Grade 5	50	49	-1
Grade 8	39	39	0
Grade 10 <sup>a</sup>	57	61	+4

<sup>a</sup> Grade 10 STE results are reported based on students' best performance on any STE test taken in grade 9 or grade 10; only students continuously enrolled in Massachusetts public schools from fall of grade 9 through spring of grade 10 are included.

## Performance Level Results by Race/Ethnicity

### English Language Arts

Between 2008 and 2009 in English Language Arts, the percentage of African American, Asian, Hispanic/Latino, and white students scoring *Proficient* or higher improved by one to seven percentage points at most grade levels. The largest gains were made by African American and Hispanic/Latino students at grade 10, where both subgroups improved by seven percentage points. Results declined or were flat at grade 6, where African American and Asian students each experienced a decline of two percentage points and Hispanic/Latino and white students showed no change, and at grade 7, where white students showed no change.

Table 4 below summarizes the changes in the percentage of students scoring *Proficient* or higher in ELA for the major racial/ethnic subgroups in the state.

**Table 4: 2008–2009 Statewide MCAS English Language Arts Results by Race/Ethnicity**

Race/Ethnicity	Change in Percentage of Students Scoring <i>Proficient</i> or Higher, 2008 to 2009						
	Grade 3	Grade 4	Grade 5	Grade 6	Grade 7	Grade 8	Grade 10
African American	+2	+4	+2	-2	+3	+5	+7
Asian	+2	+6	+2	-2	+1	+4	+5
Hispanic/Latino	+3	+5	+3	0	+1	+6	+7
White	+3	+5	+2	0	0	+4	+5

## Mathematics

In Mathematics, the change in the percentage of students scoring *Proficient* or higher between 2008 and 2009 for the major racial/ethnic subgroups varied. All four subgroups made improvements of one to three percentage points at grades 5, 7, and 10, had no change at grade 8, and had either a decline of up to four points or no change in achievement at grades 3 and 4. At grade 6, African American students improved by two points, Hispanic/Latino students declined by one point, and Asian and white students showed no change.

Table 5 below summarizes the changes in the percentage of students scoring *Proficient* or higher in Mathematics for the major racial/ethnic subgroups in the state.

**Table 5: 2008–2009 Statewide MCAS Mathematics Results by Race/Ethnicity**

Race/Ethnicity	Change in Percentage of Students Scoring <i>Proficient</i> or Higher, 2008 to 2009						
	Grade 3	Grade 4	Grade 5	Grade 6	Grade 7	Grade 8	Grade 10
African American	-4	-1	+3	+2	+2	0	+3
Asian	-1	-1	+2	0	+3	0	+1
Hispanic/Latino	-4	-3	+1	-1	+3	0	+2
White	0	-2	+1	0	+2	0	+3

## Science and Technology/Engineering

In Science and Technology/Engineering, the percentage of African American, Asian, Hispanic/Latino, and white students scoring *Proficient* or higher improved between 2008 and 2009 by two to five percentage points at grade 10. At grade 8, achievement of African American, Asian, and Hispanic/Latino students improved by one to two points, while achievement of white students did not change. At grade 5, achievement of Asian and Hispanic/Latino students improved by three and two points, respectively, while achievement of African American and white students each declined by one point.

Table 6 below summarizes the changes in the percentage of students scoring *Proficient* or higher in STE for the major racial/ethnic subgroups in the state.

**Table 6: 2008–2009 Statewide MCAS Science and Technology/Engineering Results by Race/ Ethnicity**

Race/Ethnicity	Change in Percentage of Students Scoring <i>Proficient</i> or Higher, 2008 to 2009		
	Grade 5	Grade 8	Grade 10 <sup>a</sup>
African American	-1	+2	+5
Asian	+3	+1	+2
Hispanic/Latino	+2	+2	+4
White	-1	0	+5

<sup>a</sup> Grade 10 STE results are reported based on students' best performance on any STE test taken in grade 9 or grade 10; only students continuously enrolled in Massachusetts public schools from fall of grade 9 through spring of grade 10 are included.

The range in the percentage of students scoring *Proficient* or higher in 2009 for the major racial/ethnic subgroups in the state is given below (see Section VI of this report for complete data). Achievement in grade 8 Science and Technology/Engineering was weak for all four subgroups but especially so for African American and Hispanic/Latino students.

- Achievement of African American students ranged from 13 percent in grade 8 STE to 63 percent in grade 8 ELA.
- Achievement of Asian students ranged from 50 percent in grade 8 STE to 86 percent in grade 10 Mathematics.
- Achievement of Hispanic/Latino students ranged from 13 percent in grade 8 STE to 56 percent in grades 8 and 10 ELA.
- Achievement of white students ranged from 47 percent in grade 8 STE to 85 percent in grades 8 and 10 ELA.

## Performance Level Results by Student Status

### English Language Arts

Between 2008 and 2009 in English Language Arts, the percentage of students with disabilities, limited English proficient students, and low-income students scoring *Proficient* or higher improved by one to eight percentage points at most grade levels. Students with disabilities made the largest gains at grade 8 (four percentage points) and grade 10 (seven points). LEP students improved most at grade 4 (five points) and grade 8 (four points). Low-income students had the largest gains at grade 8 (seven points) and grade 10 (eight points).

Table 7 below summarizes the changes in the percentage of students scoring *Proficient* or higher in ELA by student status.

**Table 7: 2008–2009 Statewide MCAS English Language Arts Results by Student Status**

Student Status	Change in Percentage of Students Scoring <i>Proficient</i> or Higher, 2008 to 2009						
	Grade	Grade	Grade	Grade	Grade	Grade	Grade
	3	4	5	6	7	8	10
Student with disabilities	0	+2	+1	-2	+1	+4	+7
LEP students	+3	+5	+2	+2	-1	+4	+2
Low-income students	+3	+3	+3	0	+2	+7	+8

## Mathematics

In Mathematics, the percentage of students with disabilities, LEP students, and low-income students scoring *Proficient* or higher improved between 2008 and 2009 at grades 5–7 (with the exception of students with disabilities at grade 5) and grade 10 by one to four percentage points and declined at grades 3 and 4 by one to four points. At grade 8, only LEP students improved, by two points. Students with disabilities improved most at grade 10 (four points). LEP students made the largest gains at grades 5, 6, and 8 (two points each). Low-income students showed the most improvement at grades 7 and 10 (three points each). At grade 3, achievement of LEP students declined by four points and low-income students dropped by three points.

Table 8 below summarizes the changes in the percentage of students scoring *Proficient* or higher in Mathematics by student status.

**Table 8: 2008–2009 Statewide MCAS Mathematics Results by Student Status**

Student Status	Change in Percentage of Students Scoring <i>Proficient</i> or Higher, 2008 to 2009						
	Grade	Grade	Grade	Grade	Grade	Grade	Grade
	3	4	5	6	7	8	10
Student with disabilities	-1	-2	0	+1	+1	0	+4
LEP students	-4	-1	+2	+2	+1	+2	+1
Low-income students	-3	-1	+2	+1	+3	0	+3

## Science and Technology/Engineering

Between 2008 and 2009 in Science and Technology/Engineering, the percentage of low-income students scoring *Proficient* or higher improved by one to five percentage points at all three grade levels tested. Achievement of students with disabilities improved at grade 8 by one point and at grade 10 by three points. LEP students made gains at grade 5 by two points and at grade 8 by one point.

Table 9 below summarizes the changes in the percentage of students scoring *Proficient* or higher in STE by student status.

**Table 9: 2008–2009 Statewide MCAS Science and Technology/Engineering Results by Student Status**

Student Status	Change in Percentage of Students Scoring <i>Proficient</i> or Higher, 2008 to 2009		
	Grade 5	Grade 8	Grade 10 <sup>a</sup>
Student with disabilities	-1	+1	+3
LEP students	+2	+1	0
Low-income students	+1	+2	+5

<sup>a</sup> Grade 10 STE results are reported based on students' best performance on any STE test taken in grade 9 or grade 10; only students continuously enrolled in Massachusetts public schools from fall of grade 9 through spring of grade 10 are included.

## Performance Level Results by Gender

### English Language Arts

Between 2008 and 2009 in English Language Arts, the percentage of female students scoring *Proficient* or higher increased by one to five percentage points at all grade levels tested except grades 6 and 7. Female students made the largest gains at grade 4 (five points), grade 5 (four points), and grade 10 (four points). Achievement of male students improved by one to six points at all grades tested except grade 6. Male students showed the most improvement at grade 4 (six points) and grade 10 (five points).

Table 10 below summarizes the changes in the percentage of students scoring *Proficient* or higher in ELA by gender.

**Table 10: 2008–2009 Statewide MCAS English Language Arts Results by Gender**

Gender	Change in Percentage of Students Scoring <i>Proficient</i> or Higher, 2008 to 2009						
	Grade 3	Grade 4	Grade 5	Grade 6	Grade 7	Grade 8	Grade 10
Female	+1	+5	+4	0	-1	+3	+4
Male	+3	+6	+1	-2	+2	+4	+5

### Mathematics

In Mathematics, the percentage of female students scoring *Proficient* or higher increased between 2008 and 2009 by one to three percentage points at grades 5, 7, 8, and 10. Female students improved most at grade 10 (three points), and they had declines at grades 3 and 4 by two points each. Achievement of male students improved by one to two points at grades 5–7 and grade 10.

Table 11 below summarizes the changes in the percentage of students scoring *Proficient* or higher in Mathematics by gender.

**Table 11: 2008–2009 Statewide MCAS Mathematics Results by Gender**

Gender	Change in Percentage of Students Scoring <i>Proficient</i> or Higher, 2008 to 2009						
	Grade 3	Grade 4	Grade 5	Grade 6	Grade 7	Grade 8	Grade 10
Female	-2	-2	+2	0	+2	+1	+3
Male	-1	0	+1	+1	+2	-1	+2

### Science and Technology/Engineering

Between 2008 and 2009 in Science and Technology/Engineering, the percentage of female students scoring *Proficient* or higher improved at grades 8 and 10 by four percentage points each and declined at grade 5 by two points. Achievement of male students improved by one point at grade 5 and six points at grade 10 and did not change at grade 8.

Table 12 below summarizes the changes in the percentage of students scoring *Proficient* or higher in STE by gender.

**Table 12: 2008–2009 Statewide MCAS Science and Technology/Engineering Results by Gender**

Gender	Change in Percentage of Students Scoring <i>Proficient</i> or Higher, 2008 to 2009		
	Grade 5	Grade 8	Grade 10 <sup>a</sup>
Female	-2	+4	+4
Male	+1	0	+6

<sup>a</sup> Grade 10 STE results are reported based on students' best performance on any STE test taken in grade 9 or grade 10; only students continuously enrolled in Massachusetts public schools from fall of grade 9 through spring of grade 10 are included.

### Proficiency Gap: African American and Hispanic/Latino Students

#### English Language Arts

In English Language Arts, the proficiency gap between white students and African American students narrowed by one to three percentage points at grades 7, 8, and 10 between 2008 and 2009, while the gap widened by one to two points at grades 3, 4, and 6. The proficiency gap in ELA between white students and Hispanic/Latino students narrowed by one to two percentage points at grades 5, 7, 8, and 10 and showed no change at grades 3, 4, and 6.

Tables 13 and 14 below summarize the changes in the percentage differences of students scoring *Proficient* or higher in ELA between white students and African American and Hispanic/Latino students from 2008 to 2009.

**Table 13: 2008–2009 Statewide MCAS English Language Arts Results  
Proficiency Gap Change (in percentage points)**

Grade	African American		White		White–African American Proficiency Gap		
	Percentage of Students Scoring Proficient or Higher				2008	2009	Proficiency Gap Change, 2008–2009 <sup>a</sup>
	2008	2009	2008	2009			
Grade 3	33	35	63	66	30	31	+1
Grade 4	25	29	56	61	31	32	+1
Grade 5	37	39	69	71	32	32	0
Grade 6	47	45	74	74	27	29	+2
Grade 7	47	50	77	77	30	27	-3
Grade 8	58	63	81	85	23	22	-1
Grade 10	55	62	80	85	25	23	-2

<sup>a</sup> Negative value represents narrowing of proficiency gap, positive value represents widening of proficiency gap.

**Table 14: 2008–2009 Statewide MCAS English Language Arts Results  
Proficiency Gap Change (in percentage points)**

Grade	Hispanic/Latino		White		White–Hispanic/Latino Proficiency Gap		
	Percentage of Students Scoring Proficient or Higher				2008	2009	Proficiency Gap Change, 2008–2009 <sup>a</sup>
	2008	2009	2008	2009			
Grade 3	29	32	63	66	34	34	0
Grade 4	23	28	56	61	33	33	0
Grade 5	32	35	69	71	37	36	-1
Grade 6	40	40	74	74	34	34	0
Grade 7	42	43	77	77	35	34	-1
Grade 8	50	56	81	85	31	29	-2
Grade 10	49	56	80	85	31	29	-2

<sup>a</sup> Negative value represents narrowing of proficiency gap, positive value represents widening of proficiency gap.

## Mathematics

In Mathematics, the proficiency gap between white students and African American students widened at grade 3 only, by four percentage points, between 2008 and 2009, narrowed by one to two points at grades 4–6, and stayed the same at grades 7, 8, and 10. The proficiency gap between white students and Hispanic/Latino students widened by one to four points at grades 3, 4, 6, and 10, showed no change at grades 5 and 8, and narrowed at grade 7, by one percentage point.

Tables 15 and 16 below summarize the changes in the percentage differences in Mathematics achievement between white and African American and Hispanic/Latino students from 2008 to 2009.

**Table 15: 2008–2009 Statewide MCAS Mathematics Results  
Proficiency Gap Change (in percentage points)**

Grade	African American		White		White–African American Proficiency Gap		
	Percentage of Students Scoring Proficient or Higher				2008	2009	Proficiency Gap Change, 2008–2009 <sup>a</sup>
	2008	2009	2008	2009			
Grade 3	37	33	67	67	30	34	+4
Grade 4	26	25	56	54	30	29	-1
Grade 5	28	31	59	60	31	29	-2
Grade 6	30	32	63	63	33	31	-2
Grade 7	21	23	54	56	33	33	0
Grade 8	24	24	56	56	32	32	0
Grade 10	48	51	78	81	30	30	0

<sup>a</sup> Negative value represents narrowing of proficiency gap, positive value represents widening of proficiency gap.

**Table 16: 2008–2009 Statewide MCAS Mathematics Results  
Proficiency Gap Change (in percentage points)**

Grade	Hispanic/Latino		White		White–Hispanic/Latino Proficiency Gap		
	Percentage of Students Scoring Proficient or Higher				2008	2009	Proficiency Gap Change, 2008–2009 <sup>a</sup>

Grade 3	39	35	67	67	28	32	+4
Grade 4	28	25	56	54	28	29	+1
Grade 5	27	28	59	60	32	32	0
Grade 6	30	29	63	63	33	34	+1
Grade 7	19	22	54	56	35	34	-1
Grade 8	22	22	56	56	34	34	0
Grade 10	46	48	78	81	32	33	+1

<sup>a</sup> Negative value represents narrowing of proficiency gap, positive value represents widening of proficiency gap.

## Science and Technology/Engineering

Between 2008 and 2009 in Science and Technology/Engineering, the proficiency gap between white students and African American students did not change at grades 5 and 10 and narrowed by two percentage points at grade 8. The proficiency gap in STE between white students and Hispanic/Latino students narrowed by three points at grade 5 and two points at grade 8 and widened by one point at grade 10.

Tables 17 and 18 below summarize the changes in the percentage differences in STE achievement between white and African American and Hispanic/Latino students from 2008 to 2009.

**Table 17: 2008–2009 Statewide MCAS Science and Technology/Engineering Results  
Proficiency Gap Change (in percentage points)**

Grade	African American		White		White–African American Proficiency Gap

<sup>b</sup> Grade 10 STE results are reported based on students' best performance on any STE test taken in grade 9 or grade 10; only students continuously enrolled in Massachusetts public schools from fall of grade 9 through spring of grade 10 are included.

## Proficiency Gap: Students with Disabilities

Between 2008 and 2009 in English Language Arts, the proficiency gap between students with disabilities and all students narrowed by one percentage point at grade 8 and three points at grade 10, widened by one to three points at grades 3–6, and stayed the same at grade 7. The proficiency gap in Mathematics between students with disabilities and all students narrowed by one point at grades 8 and 10, widened by one to two percentage points at grades 4, 5, and 7, and remained the same at grades 3 and 6. In Science and Technology/Engineering, the proficiency gap between students with disabilities and all students narrowed by one point at grade 8, widened by one point at grade 10, and showed no change at grade 5.

Tables 19–21 below summarize the changes in the percentage differences in ELA, Mathematics, and STE achievement, respectively, between students with disabilities and all students from 2008 to 2009.

**Table 19: 2008–2009 Statewide MCAS English Language Arts Results  
Proficiency Gap Change (in percentage points)**

Grade	Students with Disabilities		All Students		Proficiency Gap

<sup>a</sup> Negative value represents narrowing of proficiency gap, positive value represents widening of proficiency gap.

<sup>b</sup> Grade 10 STE results are reported based on students' best performance on any STE test taken in grade 9 or grade 10; only students continuously enrolled in Massachusetts public schools from fall of grade 9 through spring of grade 10 are included.

## Proficiency Gap: Limited English Proficient Students

Between 2008 and 2009 in English Language Arts, the proficiency gap between limited English proficient (LEP) students and all students narrowed by one to three percentage points at grades 3, 6, and 8, widened by two points at grades 7 and 10, and stayed the same at grades 4 and 5. In Mathematics, the proficiency gap between LEP students and all students narrowed by one point at grade 6 and three points at grade 8, widened by one to three percentage points at grades 3, 7, and 10, and remained the same at grades 4 and 5. In Science and Technology/Engineering, the proficiency gap between LEP students and all students narrowed by three points at grade 5 and one point at grade 8 and widened by four points at grade 10.

Tables 22–24 below summarize the changes in the percentage differences in ELA, Mathematics, and STE achievement, respectively, between LEP students and all students from 2008 to 2009.

**Table 22: 2008–2009 Statewide MCAS English Language Arts Results**  
**Proficiency Gap Change (in percentage points)**

Grade	LEP Students		All Students		Proficiency Gap		
	Percentage of Students Scoring <i>Proficient or Higher</i>				2008	2009	Proficiency Gap Change, 2008–2009 <sup>a</sup>
	2008	2009	2008	2009			
Grade 3	20	23	56	57	36	34	-2
Grade 4	12	17	49	54	37	37	0
Grade 5	15	17	61	63	46	46	0
Grade 6	16	18	67	66	51	48	-3
Grade 7	15	14	69	70	54	56	+2
Grade 8	19	23	75	78	56	55	-1
Grade 10	17	19	75	79	58	60	+2

<sup>a</sup> Negative value represents narrowing of proficiency gap, positive value represents widening of proficiency gap.

Grade 5	9	11	50	49	41	38	-3
Grade 8	3	4	39	39	36	35	-1
Grade 10 <sup>b</sup>	12	12	57	61	45	49	+4

<sup>a</sup> Negative value represents narrowing of proficiency gap, positive value represents widening of proficiency gap.

<sup>b</sup> Grade 10 STE results are reported based on students' best performance on any STE test taken in grade 9 or grade 10; only students continuously enrolled in Massachusetts public schools from fall of grade 9 through spring of grade 10 are included.

### Proficiency Gap: Low-Income Students

In English Language Arts, the proficiency gap between low-income students and all students widened at grade 4 only, by two percentage points, between 2008 and 2009, and narrowed at all other grade levels by one to four points. The proficiency gap in Mathematics between low-income students and all students widened at grade 3 only, by two percentage points, narrowed at grades 7 and 8 by one point, and showed no change at grades 4–6 and 10. In Science and Technology/Engineering, the proficiency gap between low-income students and all students narrowed at all grade levels by one to two points.

Tables 25–27 below summarize the changes in the percentage differences in ELA, Mathematics, and STE achievement, respectively, between low-income students and all students from 2008 to 2009.

**Table 25: 2008–2009 Statewide MCAS English Language Arts Results  
Proficiency Gap Change (in percentage points)**

Grade	Low-Income Students		All Students		Proficiency Gap

<sup>a</sup> Negative value represents narrowing of proficiency gap, positive value represents widening of proficiency gap.

<sup>b</sup> Grade 10 STE results are reported based on students' best performance on any STE test taken in grade 9 or grade 10; only students continuously enrolled in Massachusetts public schools from fall of grade 9 through spring of grade 10 are included.

## Competency Determination Attainment Results

The class of 2003 was the first graduating class in Massachusetts that was required to earn a Competency Determination (in addition to meeting local requirements) to be eligible to graduate from high school. In order to earn a Competency Determination (CD), students in the classes of 2003–2009 were required to earn a scaled score of 220 (*Needs Improvement*) or higher on the grade 10 MCAS tests or retests in English Language Arts and Mathematics.

Beginning with the class of 2010, in order to earn a CD, students must *either* earn a scaled score of 240 (*Proficient*) or higher on the grade 10 MCAS ELA and Mathematics tests or retests, *or* earn a score of 220–238 on the grade 10 MCAS ELA and Mathematics tests or retests and fulfill the requirements of an Educational Proficiency Plan (EPP).

Each EPP must include, at a minimum:

- a review of the student's strengths and weaknesses, based on MCAS and other assessment results, coursework, grades, and teacher input;
- the courses the student will be required to take and successfully complete in grades 11 and 12; and

- a description of the assessments the school will administer on a regular basis to determine if the student is moving toward proficiency. For 2008–2009, the assessment options included locally developed end-of-course assessments, locally scored grade 10 MCAS test forms designed for the EPP, and College Board’s Accuplacer.

More information about EPP requirements can be found on the Department’s website at <http://www.doe.mass.edu/hsreform/epp/>.

Students in the class of 2010 and beyond also must earn a score of 220 or higher on one of four high school MCAS tests in Science and Technology/Engineering (Biology, Chemistry, Introductory Physics, or Technology/Engineering) to be eligible to receive a high school diploma. In addition, students must meet all local requirements in order to graduate.

Table 28 below displays the cumulative percentage of all students and student subgroups in the class of 2011 who have already met or partially met the MCAS requirements for earning a CD by performing at the *Needs Improvement* level or higher in ELA, Mathematics, and STE through the spring 2009 test administration. Eighty-three percent of students in the class of 2011 performed at the *Needs Improvement* level or higher in all three subjects, 88 percent did so in ELA and Mathematics, 93 percent performed at this level in ELA, 90 percent did so in Mathematics, and 88 percent did so in STE. More than one-third of the students in the class of 2011 require an Educational Proficiency Plan: 5 percent require an EPP in ELA only, 11 percent require one in Mathematics only, and 18 percent require one in both subjects.

**Table 28: 2009 Statewide MCAS Results: Class of 2011**  
**Percentage of Students Scoring *Needs Improvement* or Higher in ELA, Mathematics, and STE**  
**through the Spring 2009 Administration**

Limited English Proficient (LEP)	59	60	47	47	35
Formerly LEP (FLEP)	88	80	76	74	66
LEP and FLEP	67	66	55	55	44
Low Income	87	81	77	76	68

The percentage of students scoring *Needs Improvement* or higher in ELA, Mathematics, and STE varied widely by subgroup, however.

- Of the major racial/ethnic subgroups in the state, the percentage of students scoring *Needs Improvement* or higher in all three subjects was highest for white students at 90 percent, followed by Asian students at 87 percent, African American students at 66 percent, and Hispanic/Latino students at 62 percent.
- Thirty-five percent of LEP students performed at the *Needs Improvement* level or higher in all three subjects, while 55 percent of students with disabilities and 68 percent of low-income students did so.

Table 29 below shows the number and cumulative percentage of students in the class of 2011 who have already fully met the CD standard by performing at the *Proficient* level or higher in both ELA and Mathematics and by performing at the *Needs Improvement* level or higher in STE, and the corresponding figures for the individual components of the CD standard, through the spring 2009 test administration. Sixty-five percent of students in the class of 2011 have earned a CD by performing at the *Proficient* level or higher in both ELA and Mathematics and by performing at the *Needs Improvement* level or higher in STE. For the separate components of the CD requirement, 66 percent of students performed at the *Proficient* level or higher in both ELA and Mathematics, and 88 percent of students performed at the *Needs Improvement* level or higher in STE.

<b>Table 29: 2009 Statewide MCAS Results: Class of 2011</b>		
<b>Number and Percentage of Students Scoring <i>Proficient</i> or Higher in ELA and Mathematics and <i>Needs Improvement</i> or Higher in STE through the Spring 2009 Administration</b>		
<b>CD Requirement</b>	<b>Number</b>	<b>Percent</b>
Earned CD	48,205	65
ELA and Mathematics <i>Proficient</i> or Higher	48,742	66
ELA <i>Proficient</i> or Higher	57,172	77
Mathematics <i>Proficient</i> or Higher	52,780	71
STE <i>Needs Improvement</i> or Higher	65,322	88

Table 30 below displays the number and percentage of students in the classes of 2011 and 2012 who took a discipline-specific high school Science and Technology/Engineering test in grade 9 or grade 10 and those who earned a score of *Needs Improvement* or higher.

Of the grade 9 students in the class of 2011 who participated in an STE test, the percentage at the *Needs Improvement* level or higher ranged from 91 percent in Technology/Engineering to 53 percent in Chemistry. Of the grade 10 students in the class of 2011 who participated in an STE test, the percentage performing at *Needs Improvement* or higher ranged from 84 percent in Biology to 58 percent in Chemistry. Of the grade 9 students in the class of 2012 who participated in an STE test, the percentage reaching *Needs Improvement* or higher ranged from 92 percent in Technology/Engineering to 56 percent in Chemistry.

**Table 30: 2009 Statewide MCAS Results: Classes of 2011 and 2012  
Number and Percentage of Students in Grades 9 and 10 Scoring *Needs Improvement* (NI)  
or Higher in High School Science and Technology/Engineering<sup>a</sup>**

## II. 2009 MCAS At-A-Glance

### What is MCAS?

The Massachusetts Comprehensive Assessment System (MCAS) is the state's standards-based student assessment program.

MCAS has three primary purposes: 1) to inform and improve curriculum and instruction; 2) to evaluate student, school, and district performance according to the Massachusetts curriculum framework content standards and MCAS performance standards; and 3) to determine eligibility for the high school Competency Determination.

### Who participates in MCAS?

All students who are enrolled in the tested grades and who are educated with Massachusetts public funds are required by state and federal law to participate in MCAS testing.

All students with disabilities and limited English proficient (LEP) students must participate in MCAS testing. Students with disabilities may receive testing accommodations that are specified in their Individualized Education Programs (IEPs) or 504 plans and are routinely used during classroom instruction and testing. Federal guidelines allow schools the option of excusing first-year LEP students from the English Language Arts tests.

Students with significant cognitive disabilities who are unable to take the standard MCAS tests, even with accommodations, are required to participate in the MCAS Alternate Assessment (MCAS-Alt). The MCAS-Alt enables these students to submit portfolios of their work that demonstrate their performance on the curriculum framework learning standards.

### Which MCAS tests were administered in 2009?

In 2009, a total of 17 operational MCAS tests in English Language Arts, Mathematics, and Science and Technology/Engineering were administered to students across eight grade levels.

Table 31 below shows the MCAS tests administered at each grade level in 2009.

Table 31: 2009 MCAS Tests Administered by Grade Level								
Content Area	Grade Level							
	3	4	5	6	7	8	9	10
English Language Arts	✓	✓	✓	✓	✓	✓		✓
Mathematics	✓	✓	✓	✓	✓	✓		✓
Science and Technology/Engineering			✓			✓	✓	✓

In February 2009, due to fiscal considerations, the Board of Elementary and Secondary Education approved a two-year suspension of operational MCAS History and Social Science testing and waived the Competency Determination requirement in this subject area for the classes of 2012 and 2013. As a result, no History and Social Science tests were administered in grades 5, 7, and high school in spring 2009 as had been planned.

## What are the tests' administration guidelines?

MCAS test sessions are designed to be completed in 45–60 minutes. However, all MCAS test administrations are untimed, and schools must allocate the necessary resources, including staff and classrooms, to ensure that all students have sufficient time to complete each individual session.

Except in grade 3 (for which a combined test/answer booklet is used), students at each grade level receive separate test and answer booklets. The test booklets contain all item-specific information, including the actual test questions, any reading passages and corresponding illustrations, writing prompts, and answer options for multiple-choice items. Students record their answers to each test item in the corresponding answer booklet.

The standard MCAS tests are composed of a variety of question types at each grade level. Table 32 below shows the point values of test items by types of test items used on the 2009 MCAS tests.

Table 32: Total Raw Score Points by Item Type: 2009 MCAS Tests					
Subject-Area Test	Raw Score Point Values by Item Type				Total Number of Raw Score Points
	Multiple-Choice	Open-Response	Short-Answer	Writing Prompt	
Grade 3					
English Language Arts	40	8			48
Mathematics	25	10	5		40
Grade 4					
English Language Arts	36	16		20	72
Mathematics	29	20	5		54
Grade 5					
English Language Arts	36	16			52
Mathematics	29	20	5		54
Science and Tech/Eng	34	20			54
Grade 6					
English Language Arts	36	16			52
Mathematics	29	20	5		54
Grade 7					
English Language Arts	36	16		20	72
Mathematics	29	20	5		54
Grade 8					
English Language Arts	36	16			52
Mathematics	29	20	5		54
Science and Tech/Eng	34	20			54
Grade 10/High School					
English Language Arts	36	16		20	72
Mathematics	32	24	4		60
Science and Tech/Eng	40	20			60

Each MCAS test booklet contains both *common* and *matrix-sampled* questions. Common questions—which comprise roughly 80 percent of a student's test booklet—are those items that are identical in each student's booklet and from which all student, school, and district results are derived. Prior to 2009, the Department of Elementary and Secondary Education released 100 percent of the common items to the public after each test administration for use as a tool to improve curriculum and instruction. Beginning in

2009, in order to reduce testing time and test development costs, the Department began releasing approximately 50 percent of the common items for grades 3–8 while continuing to release 100 percent of the common items at the high school level (with the exception of the Chemistry and Technology/Engineering tests, for which no common items were released). Matrix-sampled questions are used to equate MCAS tests from year to year and to field test new items for future tests.

## When are MCAS tests administered?

Each spring there are three MCAS test administration periods. In 2009, the first testing period was from March 30–April 14 for tests in English Language Arts. The second testing period was from May 11–May 28 for tests in Mathematics and grades 5 and 8 Science and Technology/Engineering. The third testing period was from June 4–9 for the end of course high school STE tests.

## How are results on MCAS tests reported?

Results on the MCAS tests are reported by performance levels that describe a student’s knowledge and skills as they relate to the performance standards contained in the Massachusetts curriculum framework content standards. Students receive a separate score and attain a separate performance level in each subject area. School and districts results are reported according to the percentage of students attaining each performance level in each grade-level subject area tested.

Table 33 below provides the general MCAS performance level descriptions.

<b>Table 33: General MCAS Performance Level Definitions</b>	
<b>Performance Level</b>	<b>Description</b>
<i>Advanced (Grades 4–8, 10)</i>	Students at this level demonstrate a comprehensive and in-depth understanding of rigorous subject matter and provide sophisticated solutions to complex problems.
<i>Above Proficient (Grade 3)</i>	Students at this level demonstrate mastery of challenging subject matter and construct solutions to challenging problems.
<i>Proficient</i>	Students at this level demonstrate a solid understanding of challenging subject matter and solve a wide variety of problems.
<i>Needs Improvement</i>	Students at this level demonstrate a partial understanding of subject matter and solve some simple problems.
<i>Warning / Failing</i>	Students at this level demonstrate a minimal understanding of subject matter and do not solve simple problems.

Except for grade 3, where raw score points representing the total number of points a student earned are reported, student-level MCAS results are reported as scaled scores, which range from 200 to 280 in each content area. Scaled scores provide more precise feedback to schools, parents, and students by quantifying a student’s achievement according to the continuum of scores within performance levels. Table 34 below provides the scaled score point ranges and their corresponding performance levels.

**Table 34: MCAS Scaled Score Ranges (Grades 4–10)**

<b>Scaled Score Range</b>	<b>Performance Level</b>
260–280	<i>Advanced</i>
240–258	<i>Proficient</i>
220–238	<i>Needs Improvement</i>
200–218	<i>Warning / Failing</i>

### **How does the Department collect and report race/ethnicity data?**

Pursuant to Massachusetts General Laws, Chapter 69, Section 1I, the Department is authorized to collect race/ethnicity data but cannot make such information public. The Department reports these data only in the aggregate. Prior to the 2005–2006 school year, the Department collected data on students according to the following five race/ethnicity categories:

- African American
- American Indian or Alaskan Native
- Asian or Pacific Islander
- Hispanic
- White

Each student was identified by one and only one race/ethnicity category.

Beginning in 2006, the Department revised its data collection procedures to comply with the Office of Management and Budget (OMB) revisions to the standards for classification of federal data on race and ethnicity announced in the Federal Register Notice of October 30, 1997. The revised standards require that agencies offer individuals the opportunity to select one or more races when reporting information on race in federal data collections. In addition, race and Hispanic/Latino origin are considered as two separate and distinct concepts.

In accordance with these changes, the Department now reports aggregate MCAS results according to the following seven race/ethnicity categories:

- African American
- Asian
- Hispanic/Latino
- Native American
- White
- Native Hawaiian/Pacific Islander
- Multi-race (non-Hispanic/Latino)

MCAS results reported according to the former five race/ethnicity categories and the current seven race/ethnicity categories are not directly comparable. To better inform comparisons made between MCAS results by race/ethnicity across years, the Department published the 2005–2006 MCAS Race/Ethnicity Comparison Report, which can be found at <http://profiles.doe.mass.edu/mcas/racecomparison.aspx?linkid=29&orgcode=00000000&fycode=2006&orgtypecode=0>. This report provides a crosswalk between the current and former race/ethnicity categories, giving both total numbers of students tested and percentages of students at each performance level. This information is also available at the school and district levels on the Department's website through the school and district profiles.

### **Where can I find more information on MCAS?**

The Department's website is a resource for educators, parents, and others who are seeking additional information on MCAS results, released items, curriculum frameworks, and other test-related topics. To access that information, visit <http://www.doe.mass.edu/mcas/>. If you have additional questions, you may contact the Department's Student Assessment Services Unit at 781-338-3625.

### III. 2009 Statewide MCAS Participation Results

#### Students Tested

Table 35 below presents information on the number and percentage of enrolled students who participated in the spring 2009 MCAS tests. The figures include participation rates for all enrolled students educated with public funds, including regular education students, students with disabilities, and limited English proficient students. As in previous years, participation rates were very high, ranging from 98 to 100 percent.

**Table 35: Adequate Yearly Progress (AYP) Participation Rates<sup>a</sup>  
Number and Percentage of Enrolled Students Tested on the Spring 2009 MCAS Tests**

Grade	English Language Arts		Mathematics		Science and Technology/Engineering <sup>b</sup>	
	Number	Percent	Number	Percent	Number	Percent
Grade 3	70,656	100	70,822	100		
Grade 4	70,407	99	70,714	100		
Grade 5	71,657	100	71,801	100	71,691	100
Grade 6	70,942	100	71,083	100		
Grade 7	71,648	99	71,979	99		
Grade 8	73,090	99	73,170	99	72,982	99
Grade 10	72,543	98	70,171	98	68,046	98

<sup>a</sup> Includes regular education students, students with disabilities, and limited English proficient students.

<sup>b</sup> Grade 10 STE figures include students in the class of 2011 who participated in an STE test in grade 9 in 2008 or grade 10 in 2009; only students continuously enrolled in Massachusetts public schools from fall of grade 9 through spring of grade 10 are included.

#### How is participation calculated?

Participation rates indicate the number of students who participated in standard MCAS tests and the MCAS Alternate Assessment (MCAS-Alt) divided by the number of students enrolled on the date the tests were administered. LEP students enrolled in U.S. schools for the first time are not required to take ELA tests; however, they are included in school and district participation rates based on their participation in the Massachusetts English Proficiency Assessment (MEPA). Students absent during testing, including those with medical excuses, are counted against school and district participation as non-participants. A student is neither a participant nor a non-participant (i.e., excluded from both the numerator and the denominator in participation rate calculations) if all of the following statements are true: 1) the student transferred during the testing window (between the first day of ELA testing and the last day of testing for Mathematics or STE); 2) the student missed at least one entire session of the test in question; and 3) the student was not medically excused or absent for the test in question.

#### How are absent students treated in MCAS performance results?

The federal No Child Left Behind (NCLB) Act has impacted the reporting of absent students in school and district performance results. Federal guidelines require that absent students be counted strictly as non-participants for school and district Adequate Yearly Progress (AYP) calculations. As a result, the Department no longer assigns students who are absent without a medically excused absence a scaled score of 200 and a performance level of *Warning/Failing*. Instead, to bring MCAS reporting procedures in line with AYP procedures, absent students are counted as non-participants and are no longer included in MCAS performance results.

## IV. 2009 Statewide MCAS Results Disaggregated by Subgroup

Tables 36–52 below provide summary statewide performance level results disaggregated by subgroup for the spring 2009 MCAS tests.

Table 36: 2009 Statewide MCAS Results: Grade 3 English Language Arts Percentage of Students at Each Performance Level <sup>a</sup>				
Subgroup	<i>Above Proficient</i>	<i>Proficient</i>	<i>Needs Improvement</i>	<i>Warning</i>
<b>All Students</b>	12	45	33	10
<b>Gender</b>

Formerly LEP (FLEP)	4	26	46	25
LEP and FLEP	2	16	42	39
Low Income	4	32	44	20

<sup>a</sup> These results are reported based on students' best performance on any STE test taken in grade 9 or grade 10; only students continuously enrolled in Massachusetts public schools from fall of grade 9 through spring of grade 10 are included. Percentages may not total 100 due to rounding. For the purpose of computing state results, students who were absent with or without a medically documented excuse from any subject area MCAS test are not included in performance results but are counted as non-participants for that subject area.

## V. Statewide MCAS Trend Results

Tables 53–59 below provide statewide aggregate trend performance level results for the 1998–2009 MCAS tests. Not all tests were administered in all years.

Table 53: 2001–2009 Statewide MCAS Results: Grade 3 Percentage of Students at Each Performance Level <sup>a</sup>					
Subject / Year		<i>Above Proficient</i>	<i>Proficient</i>	<i>Needs Improvement</i>	<i>Warning</i>
<b>English Language Arts</b>					
	<b>2009</b>	<b>12</b>	<b>45</b>	<b>33</b>	<b>10</b>
	2008	15	41	33	11
	2007	14	45	32	9
	2006	18	40	33	8
	2005	–	62	31	7
	2004	–	63	30	7
	2003	–	63	31	6
	2002	–	67	27	6
	2001	–	62	31	7
<b>Mathematics</b>					
	<b>2009</b>	<b>20</b>	<b>40</b>	<b>25</b>	<b>15</b>
	2008	25	36	25	14
	2007	19 <sup>b</sup>	41	24	16
	2006	4	48	32	16

<sup>a</sup> Percentages may not total 100 due to rounding. For the purpose of computing state results, students who were absent with or without a medically documented excuse from any subject area MCAS test are not included in performance results but are counted as non-participants for that subject area.

<sup>b</sup> The *Above Proficient* standard in Mathematics was reset in 2007 to better measure student performance in the top reporting category. Therefore, comparisons should not be made between the percent *Above Proficient* in 2006 and 2007. However, comparisons may be drawn between the combined percent of students scoring *Proficient* and *Above Proficient* in 2006 and 2007.

**Table 54: 1998–2009 Statewide MCAS Results: Grade 4**

<sup>a</sup> Percentages may not total 100 due to rounding. For the purpose of computing state results, students who were absent with or without a medically documented excuse from any subject area MCAS test are not included in performance results but are counted as non-participants for that subject area.

<sup>b</sup> Grade 10 STE results are reported based on students' best performance on any STE test taken in grade 9 or grade 10; only students continuously enrolled in Massachusetts public schools from fall of grade 9 through spring of grade 10 are included.

## VI. Statewide MCAS Trend Results Disaggregated by Subgroup

This section provides detailed information regarding statewide student subgroup participation and performance level results for the 2009 MCAS tests. Tables 60–76 show results by student status (e.g., LEP); Tables 77–83 give results by race/ethnicity; and Tables 84 and 85 show results by gender. The following list provides definitions of the student status groups that appear in this section:

*Non-Disabled:* A student who is non-disabled does not have an Individualized Education Program (IEP) provided under the federal Individuals with Disabilities Education Act.

*Students with Disabilities:* A student with a disability has an IEP provided under the Individuals with Disabilities Education Act.

*Limited English Proficient:* A limited English proficient (LEP) student is “a student whose first language is a language other than English and who is unable to perform ordinary classroom work in English.”

*Formerly Limited English Proficient:* A student who is formerly limited English proficient (FLEP) has transitioned out of LEP status during the current school year or within the past two school years. The federal government requires that states continue to monitor the progress of FLEP students. The combined LEP and FLEP reporting category represents the official AYP subgroup reporting category.

*Low Income:* Students identified as low income are those who are eligible to receive free or reduced-price school lunch according to federal guidelines.

**Table 60: 2005–2009 Statewide MCAS Results by Student Status: Grade 3 English Language Arts

<sup>a</sup> Percentages may not total 100 due to rounding. For the purpose of computing state results, students who were absent with or without a medically documented excuse from any subject area MCAS test are not included in performance results but are counted as non-participants for that subject area.

<sup>b</sup> The *Above Proficient* standard in Mathematics was reset in 2007 to better measure student performance in the top reporting category. Therefore, comparisons should not be made between the percent *Above Proficient* in 2006 and 2007. However, comparisons may be drawn between the combined percent of students scoring *Proficient* and *Above Proficient* in 2006 and in 2007.

<sup>a</sup> These results are reported based on students' best performance on any STE test taken in grade 9 or grade 10; only students continuously enrolled in Massachusetts public schools from fall of grade 9 through spring of grade 10 are included. Percentages may not total 100 due to rounding. For the purpose of computing state results, students who were absent with or without a medically documented excuse from any subject area MCAS test are not included in performance results but are counted as non-participants for that subject area.

The following tables provide statewide summary results for the 2009 MCAS tests disaggregated by seven race/ethnicity categories and by gender.

	2008	3	25	45	27	5,514

<sup>a</sup> Percentages may not total 100 due to rounding. For the purpose of computing state results, students who were absent with or without a medically documented excuse from any subject area MCAS test are not included in performance results but are counted as non-participants for that subject area.

<sup>b</sup> The *Above Proficient* standard in grade 3 Mathematics was reset in 2007 to better measure student performance in the top reporting category. Therefore, comparisons should not be made between the percent *Above Proficient* in 2006 and 2007. However, comparisons may be drawn between the combined percent of students scoring *Proficient* and *Above Proficient* in 2006 and in 2007.

<sup>c</sup> Grade 10 STE results are reported based on students' best performance on any STE test taken in grade 9 or grade 10; only students continuously enrolled in Massachusetts public schools from fall of grade 9 through spring of grade 10 are included.

	2008	2	22	43	32	7,884

<sup>a</sup> Percentages may not total 100 due to rounding. For the purpose of computing state results, students who were absent with or without a medically documented excuse from any subject area MCAS test are not included in performance results but are counted as non-participants for that subject area.

<sup>b</sup> The *Above Proficient* standard in grade 3 Mathematics was reset in 2007 to better measure student performance in the top reporting category. Therefore, comparisons should not be made between the percent *Above Proficient* in 2006 and 2007. However, comparisons may be drawn between the combined percent of students scoring *Proficient* and *Above Proficient* in 2006 and in 2007.

<sup>c</sup> Grade 10 STE results are reported based on students' best performance on any STE test taken in grade 9 or grade 10; only students continuously enrolled in Massachusetts public schools from fall of grade 9 through spring of grade 10 are included.

<sup>a</sup> Percentages may not total 100 due to rounding. For the purpose of computing state results, students who were absent with or without a medically documented excuse from any subject area MCAS test are not included in performance results but are counted as non-participants for that subject area.

<sup>b</sup> The *Above Proficient* standard in grade 3 Mathematics was reset in 2007 to better measure student performance in the top reporting category. Therefore, comparisons should not be made between the percent *Above Proficient* in 2006 and 2007. However, comparisons may be drawn between the combined percent of students scoring *Proficient* and *Above Proficient* in 2006 and in 2007.

<sup>c</sup> Grade 10 STE results are reported based on students' best performance on any STE test taken in grade 9 or grade 10; only students continuously enrolled in Massachusetts public schools from fall of grade 9 through spring of grade 10 are included.
